

DECEMBER 2017

A Division of Norstar Aluminum Molds

What's New?

RotoMart News has a new look!

Welcome to the RotoMart News new look. Our monthly newsletter will continue to provide you with information about great products, problem solutions, used mold products, and up-to-date assistance for rotational molders. The new format is design for most applications including smart phones, tablets and laptops. We hope you will continue to find our newsletter informative and helpful to your business.

Your RotoMart Team

What's Your Problem?

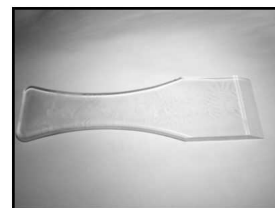

Keeping Parting Lines Clean

We all know that parting lines should be kept clean. In some form or other, there is a necessity to perform some sort of cleaning every cycle. This may be as simple as brushing away resin, or more aggressively scraping away molded resin from the last cycle.

Creative Solution

Parting Line Scraper

Well maintained parting lines are not only critical to extending the useful life of aluminum molds, they can eliminate blow holes caused by resin build up and subsequent warpage of parting lines. This creates air gaps through which air can enter a curing plastic part causing blow holes. This handy parting line cleaning tool is a low cost item with a big return if used religiously by machine operators.

What better way to try it - we'll send you one free of charge - ***one per company please.*** This offer is available through December 31, 2017. To order contact us at info@rotomart.com.

Used Mold Offering Dock Storage Box

A great product to add to any marine and boating product line. A first time offering, this well maintained, fabricated mold has a steel frame and is equipped with a mounting plate to fit a 1500 machine. Although the mold is used and the shot peen surface may need some refurbishing, the \$750 price tag is a bargain. For more information, please contact us at info@rotomart.com.

Newest Products "GRATE GRIP"

To further enhance the quick change ability and usefulness of the Common Grid system, we have developed our "Grate Grip" quick mounting system designed specifically for Common Grids. [Learn more about this time saving product.](#)
